

April 5, 2005

Mr. Lawrence E. Nanney, Director
Division of Radiological Health
L & C Annex, Third Floor
401 Church Street
Nashville, TN 37243-1532

Dear Mr. Nanney:

We have reviewed the proposed changes to the Tennessee rule 1200-2-5-.161 and to Schedule RHS 8-30, "*Annual Limits on Intake (ALI) and Derived Air Concentrations (DAC) of Radionuclides for Occupational Exposure; Effluent Concentrations; Concentrations for Release to Sanitary Sewerage*" received by our office on January 26, 2005. Our review and comments are in response to Tennessee's request for Nuclear Regulatory Commission (NRC) evaluation of the changes to the Tennessee radiation control rules in response to our letter dated April 12, 2004. This review by the NRC also closes out the sections of the following letters dealing with this subject; the July 14, 2004 letter from Karen Stachowski to Paul Lohaus transmitting Tennessee's response to the final IMPEP report, the August 19, 2004 letter from Paul Lohaus regarding Tennessee's response to the final IMPEP report, and the December 10, 2004 letter from Josephine Piccone requesting the status on the Tennessee rulemaking concerning this issue. These regulations were reviewed by comparison to the equivalent NRC rules in 10 CFR Part 20 and 34. We discussed our review of these regulations with Barbara Davis on March 25, 2005.

As a result of our review, we have no comments. However, your letter stated that the revisions to the radiography regulations were to address the omission of the "registrants" from the last update of the industrial radiography regulations. We reviewed these changes to verify that the revisions did not impact the compatibility findings NRC previously made for these regulations. We found these sections met the compatibility requirements as stated in STP Procedure SA-200. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that a State regulation meets the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final State regulation. However, we have determined that if these regulations are adopted without significant change, they would meet the compatibility and health and safety categories established in STP Procedure SA-200. We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to the NRC for review.

The State Regulation Status (SRS) Data Sheet summarizes our knowledge of the status of other Tennessee regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hrsd.ornl.gov/nrc/rulemaking.htm>.

Mr. L. Nanney

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or John Zabko of my staff at (301)415-2308 or JGZ@NRC.GOV.

Sincerely,

IRA Byl

Paul Lohaus, Director
Office of State and Tribal Programs
