Mr. D. M. Jamil  
Vice President  
Catawba Nuclear Station  
Duke Energy Corporation  
4800 Concord Road  
York, SC 29745

SUBJECT: CATAWBA NUCLEAR STATION, UNITS 1 AND 2 - RESPONSE TO GENERIC LETTER 2004-01, "REQUIREMENTS FOR STEAM GENERATOR TUBE INSPECTIONS" (TAC NOS. MC4809 AND MC4810)

Dear Mr. Jamil:

On August 30, 2004, the Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 2004-01, "Requirements For Steam Generator Tube Inspections." The purpose of GL 2004-01 was to obtain information that would enable the NRC staff to determine whether licensee's steam generator (SG) tube inspection programs comply with the existing tube inspection requirements (the plant technical specifications in conjunction with Appendix B to Title 10 of the *Code of Federal Regulations* Part 50 (10 CFR Part 50, Appendix B).

By letter dated October 28, 2004, Duke Energy Corporation, responded to GL 2004-01 for Catawba Nuclear Station (Catawba), Units 1 and 2. The NRC staff's review of your response to the GL did not identify any concerns with the inspection practices employed at Catawba. The NRC staff, therefore, concludes that your SG tube inspection practices are in compliance with the existing tube inspection requirements.

If you have any questions regarding this matter, please contact me at (301) 415-1842.

Sincerely,

*/RA/*

Sean E. Peters, Project Manager, Section 1
