Subject: Re: Fwd: What we need from RES on OpManAx

thanks for feedback; it is good to now it. When Sunil comes back, I will appreciate if you could finalize it with him. Erasmia>>> Ray Gallucci 12/04/03 04:08PM >>>

That's probably it for HRA so far as Operator Manual Actions go, but I can't speak for the other fire protection issues. We'll have to wait for Sunil to return. I basically wanted your feedback on the doability of the Workshop for the specific item suggested (Complexity and Number criterion). Late February (if the criteria don't change much) or else March (if they do) is the time frame I would envision.

Unless Sunil sees a need for more HRA support, I will assume we'll informally schedule the workshop sometime in late January (after I have a good idea as to whether there will be drastic changes in the criteria) for the time frame above.

>>> Erasmia Lois 12/04/03 03:47PM >>>
Ray:

We can do the workshop in February/March time frame. The critical people for this (Alan and John) are in Millstone this and next week for the fire requantification study. Therefore, I cannot communicate with them to set dates. Please let me know what time frame are you looking for.

However, I would also like to find out if this is the only thing you would expect from RES with respect to HRA during FY04. If that is all, we can support it with out any formal request. If more work is needed we would need to have it formally requested. I will appreciate if you could clarify this for us so that we set our budget for FY04.

thanks
Erasmia
