2. Waterford 3 letter to the NRC dated March 8, 2005 Supplement to
Amendment Request NPF-38-258 To Modify Technical Specification
(TS) 5.3.1, Fuel Assemblies and TS 6.9.1.11.1, Core Operating Limits
Report (W3F1-2005-0017)

Dear Sir or Madam:

By letter (Reference 1), Entergy Operations, Inc. (Entergy) proposed a change to the Waterford Steam Electric Station, Unit 3 (Waterford 3) Technical Specifications (TSs) that in part included a request to delete the Index from the TSs. Clarification to the proposed deletion of the Index was provided in a supplement letter (Reference 2).

On March 24, 2005, Entergy and members of your staff held a call to discuss the proposed deletion of the Index. As a result of the call, the NRC requested that Entergy describe the process for distributing copies of the Technical Specifications to organizations outside of Entergy.

The distribution process requires that each time Waterford 3 receives an approved change to the TS (including a change to an index page), from the NRC or makes a change to the TS Bases under the Technical Specification Bases Control program, a transmittal form, with the accompanying changes, is sent to all controlled copy holders which include offsite organizations that maintain controlled copies of the TSs. Changes to the index pages would continue to be distributed in this manner following the approval of this amendment request.

There are no technical changes proposed. The original no significant hazards consideration included in Reference 1 is not affected by any information contained in the supplemental letter. There are no new commitments contained in this letter.

A001

If you have any questions or require additional information, please contact Dana Millar at 601-368-5445.

I declare under penalty of perjury that the foregoing is true and correct. Executed on April 5, 2005.

Sincerely,

A handwritten signature in black ink, appearing to read "Dana Millar". The signature is written in a cursive style with a large initial "D" and "M".
