Dear Michelle,

SUBJECT: AMENDMENT TO LICENSE NUMBER: 37-19568-01

C3017894

I am writing you to follow up on our amendment request:

1. Ghazanfar A. Shah, M.D., received a radiation safety overview of our HDR unit. This overview was conducted by Anthony Zhang, Medical Physicist on 3/9/2005.
2. In regards to our request that 10 CFR 35.400 be removed from our NRC license, our records show that we no longer possess any sources identified in 10 CFR 35.400 and that no leakage was found on any sources identified in 10 CFR 35.400 during our possession.

NOTE: We are currently decaying 1125 seeds that were harvested from a patient during a TURP in April 2003. The seeds have exceeded 10 half lives but are reading 0.04 mr/hr. These seeds will be properly disposed of once they have reached background.

If you require any additional information please do not hesitate to contact me at 814-375-3283 or alsidelinger@drmc.org

Thank You,

Audra L. Sidelinger, Nuclear Medicine Supervisor
