| <p>Summary:</p> <p>I received a phone message from Dr. Snyder in mid-March. He stated that he had spoken with the former Rso and with several previous workers at the University from the 70's and earlier. None had knowledge of activities with rad material beyond what is described in the FSS. He did have a box of documents that he wanted to go through to see if there was anything pertinent in there. He said he would call back when that was complete.</p> <p>4/8/05: I attempted to reach Dr. Snyder by phone. He was not in. I left a message</p> <p>4/11/05: I spoke with Dr. Snyder. He asked to have this week to review one more box of papers. I informed him that if he needed more time than that, I would void the termination request, so that he could resubmit the term when he had completed his review of the records. He stated that he would call me by 04/18 to let me know one if he needed to terminate the request.</p> | | | |
