Bill,

The issue which Mr. Landsman is referring to involves the subject DPO as you surmised.

I am currently working to retrieve historical documentation which provides our conclusions on this matter as well as the basis for those conclusions.

Following a review of these documents, Region III will coordinate with NRR to determine what actions will be necessary to resolve this issue.

Eric Duncan  
Chief, Branch 6  
Division of Reactor Projects, Region III

We got a copy of Mr. Landsman's email re: DC cook interaction coefficients. Can you help illuminate what the issue may be? I assume it deals with DPO followup work from DPO letter dated April 2, 2001. Thanks.
