**Subject:** Re: fire manual actions

Prasad called me today inquiring about any User Need that might already be in place. I informed him that you, with Alan and John, will be investigating possible follow-on support to the workshop and that any User Need would follow as appropriate. I suggested he work through you on this if he is interested in participating.

Prasad Kadambi brought to my attention the attached NUREG/BR-0303, Guidance on performance based regulation, which gives guidelines on how you can establish safety margins including temporal margins (pg 12). I think that it is a very nice resource for formulating our thinking.

have a nice weekend

Erasmia
