Re: Renewal of USNRC License #37-19062-01 03016010

Dear Sir/ Madam,

Trumbull Corporation requests the renewal of United States Nuclear Regulatory Commission (USNRC) Specific License Number 37-19062-01. Requested changes include the following:

- Naming of a new Radiation Safety Officer
- Removal of Californium-252 as line item 6.C
- Revisions to the Radiation Safety Program to include minimizing specific commitments based upon NUREG 1556, Volume 1 Guidance

Included in this request please find the following:

- USNRC Form 313
- Appendix B from NUREG 1556, Volume 1 (5 pages)

The Trumbull Corporation Materials License 37-19062-01, Condition 6.C., authorization for Troxler Model 3242 gauges containing sealed sources of Californium 252, was never exercised. The proposed Radiation Safety Officer has verified through interviews with current and previous employees, and a review of records that the Cf-252 sealed source had never been purchased. In addition, Toxler Electronics Laboratories was unable to identify any record of the sale of a Model 3242 device to Trumbull Corporation.

This correspondence represents the Trumbull Corporation Radiation Safety Program in its entirety. It is hereby requested that references to previous correspondence be removed from License Condition #20. If there are any questions please contact Chad Lincoln at (412)-205-1359.

Best regards,

Trumbull Corporation
