Mr. G. R. Peterson
Vice President
McGuire Nuclear Station
Duke Energy Corporation
12700 Hagers Ferry Road
Huntersville, NC 28078-8985

SUBJECT: MCGUIRE NUCLEAR STATION, UNITS 1 AND 2 - RESPONSE TO GENERIC LETTER 2004-01 "REQUIREMENTS FOR STEAM GENERATOR TUBE INSPECTIONS" (TAC NOS. MC4827 AND MC4828)

Dear Mr. Peterson:

On August 30, 2004, the Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 2004-01 "Requirements For Steam Generator Tube Inspections." The purpose of GL 2004-01 was to obtain information that would enable the NRC staff to determine whether licensees' steam generator (SG) tube inspection programs comply with the existing tube inspection requirements (the plant technical specifications in conjunction with Appendix B to Title 10 of the Code of Federal Regulations Part 50.)

By letter dated October 28, 2004, you responded to GL 2004-01 for McGuire Nuclear Station, Units 1 and 2. The NRC staff's review of your response to the GL did not identify any concerns with the inspection practices employed at McGuire. The NRC staff, therefore, concludes that your SG tube inspection practices are in compliance with the existing tube inspection requirements.

If you have any questions regarding this matter, please contact me at (301) 415-1388.

Sincerely,

/RA/

James J. Shea, Project Manager, Section 1
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-369 and 50-370
