Mr. McLaughlin,

The only known federally listed species at Fort Belvoir is the bald eagle. I can't imagine how decommissioning a building would affect the eagle. I think NRC would be on solid ground by determining "no effect" on federally listed species for this project.

Dear Mr. Davis:

The U. S. Nuclear Regulatory Commission (NRC) staff is requesting the U.S. Fish and Wildlife Service's comments regarding impacts to endangered and threatened species and critical habitat at the Fort Belvoir site in Northern Virginia from the decommissioning of building 7304. Please let me know if I should provide more information about this site or whether you can send a list of species and habitats. Thanks for your help.
