Section 3 of the attached contains a discussion of GCAPs, which John and Alan plan to consider as possible quantification tools at this week's workshop.

Ray,

Attached is a version of a soon to be published paper that discusses GCAPs a bit. I say a version, because there were changes made to the document by the publisher (after our review) before it was published. I have not yet received copies of the final version. In any case, section 3 of the paper discusses the idea of GCAPs (probably more than you want to read). In any case, Alan and I will be able to discuss the idea, which will probably be enough.

John

I can cover these four. Can you or John bring along, or give me the references for, the GCAPs?

Would you suggest any particular materials that should be handed out at the meeting to the participants, e.g., criteria table, "PITS", Gareth table, GCAPs, Fire Re-quant stuff ... ? If so, and there's stuff at my end that I can provide, let me know.

There'll probably be a few observers (Rulemaking Project Manager, etc.) at the meeting who will not be active participants. Note that Gareth can only attend part of the first day.
