Subject: Re: Summary of Sandia Conference Call

I agree, as soon as I have a summary let's talk. I hope I will have it done by 2:00 pm today; I will call you.

RES -
Rebase

thanks

Erasmia

This seems like a lot of hoops to jump through for a relatively simple task, so anything I can do to help.
Hopefully, Hossein and Sunil will readily agree to the value.

Sunil:

I will try to address these points to the best of my/our ability; of-course any thoughts from the group are
wellcome

thanks

MR

Erasmia - Can you prepare a brief summary of today's conference call with Sandia? Please include the following highlights:

- 1. Proposed outline of tasks (electronic file available?)
- 2. Proposed time schedule, as amended by David Diec (David - can you help Erasmia with this?)
- 3. Consensus among participants that proposed task and schedule should be pursued
- 4. Action items: NRC - provide examples of OpManAx and licensee procedures addressing these (Phil, with assistance from Peter if needed); RES - compile "wish list" of info needed and preferred member qualifications for expert elicitation (John and Alan, through Erasmia)

} *MR*
Please

Sunil - if you and Hossein agree, the proposed outline (to come from Erasmia) is the path forward, not requiring a User Need at this time.

 Erasmia:

MLR

If you can, please address the following in your summary. If you cannot that is OK. (1) In your/committee opinion, why does the proposal add value (2) how does the proposal support agency fire protection section's overall effort to risk-inform, (3) does the proposal consider my request to weigh our actions on high risk-significant manual actions? (3) why is the added value offsetting the any added burdens to implementation... Once I receive you report, I plan to meet with Hossein. If you provide your report by Friday, I plan to provide my feedback before the end of next week (I am out for about two days next week)
