 Ray,

I heard back from Jim, Peter, and Gareth and made a few changes per their recommendations. I also made your recommended changes. Mike also made some clarifications from your question, but apparently he had no other comments. Thus, it is ready to go as far as I am concerned - we have just been waiting on the panel to send any comments. I have not heard back from Mardy or Rebecca.

Gareth also recommended that for the "final version" we "expand the conclusions section to specifically address what the licensee should include in the demonstration, and how to calculate T3." This is something Alan and I are still working on and it will probably not be ready until next week sometime.

I have attached the most current version. If you want to call it final, that is fine with me. What Gareth wanted us to add will be in the reg. guide and if we decide to include this summary write-up or some version of it in the reg. guide, we can make the additions then.

Let me know, John

P.S. Do we need a formal cover sheet of some sort?
