Peter, Eva:

With Phil out, I need your help on this. Sunil has given us the OK to hold the workshop to develop the time margin information (Erasmia can suggest a date), but, as you can read, the required background information is either lacking or non-existent. Can you work your Regional contacts to find the "right" info, if available? If it's not available, then perhaps the workshop won't work - something we'll want to know.

Another item - once Erasmia sets the workshop date (assuming we can get the info for John and Alan that they think will be useful), we need a commitment from an Inspector to sit on the panel (Phil had suggested Rebecca Nease or Charlie Payne; David Lew of RES suggested someone from Region 1 - or, Eva, yourself). Can you pursue this as well?

Are John's and Alan's concerns about the credited OpManAx being mostly recovery vs. preventive true, or is this sample (tri-ennials) skewed?
