No; we have an ACRS ½ day meeting the on 4/22; Ray, John, Alan, Eva, could we all talk? If yes, John call all of us, give him your numbers by reponding to this e-mail!

✓ Can your schedule accommodate a shift in the workshop to the week of 4/19? Let Eva, Erasmia, etc., know so they can proceed. The NEI/public meeting will have to take place before the plant visit and workshop so we can formally issue the criteria to OE for their schedule. Eva is coordinating a date with NEI (possible 4/8).

Folks,

I have misinformed you concerning the dates. The second week of the Watts Bar inspection is the week starting April 12th. I think the original concern with going to Watts Bar was the timing and not whether it is a good representation of an "average" plant.

If you can move the expert panel back a week or so, this may be a great experience for your folks. Let me know, because a lot has to be done about getting approvals, access, travel, and discussing this with the licensee.

Folks,

I am not sure why some initially thought that Watts Bar was not a good plant to visit. As long as they rely on FMAs (preferably a range of different ones) to some extent and we can get information on what they are and how they implemented etc., then they should be a good plant to visit.

Since we are talking about making the visit the week of April 5, I am assuming the expert elicitation will be re-scheduled. Mardy Kazarians is intersted in supporting the expert elicitation and I believe he would very good. Any thoughts on the new dates?

John

A couple of points from my perspective. 1st: I have a travel commitment already for April 13, 14, and 15. That should not stop this for even if only John Forester could attend, he can pass on what he learned to me, etc....but the week of April 5th would be better for me. 2nd: I know we can only push back the elicitation so far but it would be far better to have any and all plant visits first, then assemble information and impressions learned as part of the pre-elicitation information gathering so that it can be shared with the experts, and then have the elicitation. This would suggest waiting to have the elicitation until the 2nd half of April (if that is OK?).

RES

John, Alan, Jim and Ray

Per forward e-mail, Watts Bar appears to be a good plan to visit. Let's plan on it;

Eva: give us the details so that we can finalize our schedules

thanks
