PREDECISIONAL INFORMATION

OK; I will not be here for two weeks in mid-June; you should directly arrange for the conference call.

Erasmia

✓ >>> Ray Gallucci 06/01/04 11:16AM >>> *MR*
NRR, with Inspector support, will provide the July 8th "training." Phil is leading the development of the "course." I will provide the discussion on Time Margin. We're hoping Rebecca can also support the effort since she was on the Panel. *MR release*

✓ >>> Erasmia Lois 06/01/04 11:00AM >>> *RES*

Peter:

I thought that RAY recommended that RES should develop training material and provide training, which is beyond the scope of what we currently have funding for. But we can definitely support a conference call on this subject. *OK*

✓ >>> Peter Koltay 06/01/04 09:10AM >>> *MR*
I would not call this training. we will solicit input from the regions on their needs and base the July discussion on that. My objective is to assure uniform implementation of what is out there now and not to introduce new inspection concepts before the final rule is published. the June phone call may be a good vehicle to obtain this info. *MR release*

I believe there is a half-day inspector training on OpManAx scheduled along with that for AssoCircx the week of July 4th (Mark - please confirm). Will John and/or Alan be able to support this? I would expect Rebecca, Eva, Peter and Phil to enlighten us as to just what would be appropriate to "teach" to the inspectors, given they've been doing these inspections for a long time and have been the ones teaching us. My expectation is that we would go through whatever John and Alan have put together for the initial draft of the Reg. Guide, emphasizing the results from the Expert Elicitation on Demo and Time Margin. Some material on the remaining criteria can be provided at a superficial level, but I don't think we really need to tell the inspectors what constitutes "good" indications, procedures, training, etc. Rebecca, as our Inspector representative from the Expert Panel, I would hope that you could guide us as to what we should "teach" (perhaps using the Cooper Demo material as a template for Demo and Time Margin?). Likewise, Peter, Eva and Phil have the Inspector experience and perspective that we need.

Should we have a meeting/telecon sometime in early/mid-June once John and Alan finish the Time Margin write-up to discuss what this Inspector training should look like? Peter, should we include anyone else from the Regions besides Rebecca (your call)? I'll be gone from 6/13-6/17 and 6/22-6/24, but I would like to get this started prior to 6/13. Let me know your schedules over the next two weeks.

It will be on the ones we developed for the Interim enforcement, namely the latest and greatest, including Time Margin.
