Subject: Re: need for expert in the fire manual actions expert elicitation

thanks you very much;

People are still trying to find someone with operations experience; I will let you know on Monday if you should fill in instead

would you be available in case any of these people cannot come?

✓>>> Eva Brown 04/29/04 09:04AM >>> *ML*
Kathleen O'Donohue out of RII was a former licensed operator and current team leader for FP. She would be an excellent choice if she is available. Also Charlie Payne as he has a operator licensing background and also serves as RII team leader.

Next week (5/4 75) we will reconvene the expert elicitation for developing the time margins for the fire manual actions. However, our reactor operations expert, Mike Jungle, has had an operation this week and he may not be able at all, or he may be able to partially, support the panel. Because recent plant operations expertise with an understanding of fire manual actions is important, we are looking for someone that would be able to support the panel (at least those times that Mike would not be there) by providing the needed plant operations relevant information (but not estimating values at this time since did not had the benefit of the first session).

the dates of the meeting are: 5/4 and 5, 8:30-5:00

Do you know of any experts (Phil., Mark, or you Eva are potentially good options) that could help us this effort?

CC: Andrew Kugler; Ray Gallucci; Sunil Weerakkody
