Blairsville, PA 15717-8904

SUBJECT: INSPECTION 07000026/2005001; WESTINGHOUSE ELECTRIC COMPANY

Dear Mr. Wesolowski:

On March 29, 2005, Mark Roberts, of the NRC Region I Office conducted a safety inspection at your facility. Robert Maiers, Chief, Decommissioning Section, Bureau of Radiation Protection, Pennsylvania Department of Environmental Protection, accompanied Mr. Roberts during this inspection. As discussed with you and Mr. A. Joseph Nardi, the primary purpose of this inspection was to determine the status of decommissioning activities and the documentation of these activities for the Westinghouse Electric Company Blairsville, PA site. This letter forwards NRC Form 591, "Safety Inspection," indicating that no items of non-compliance were found during the above described inspection at your facility. Please retain the form in your files. No acknowledgment of this letter is required.

Based on observations and discussions during the inspection, it appears that remediation efforts at the site are complete. Final status survey documents for interior remediated areas have been transmitted to the NRC; however, we understand that you are still compiling final status survey documents for exterior areas. Because the NRC is interested in completing our oversight activities at the site as soon as reasonably achievable, from our discussions, we understand that Westinghouse's goal is to complete final status survey documentation and transmit this information to the NRC Region I office by the end of 2005. Please advise this office if you will be unable to meet this schedule. Region I staff will commence review of the documentation already submitted and will review your additional information in a timely matter.

Current NRC regulations and guidance are available at the NRC Web sites listed below or by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498. The GPO is open from 7:00 a.m. to 9:00 p.m. EST, Monday through Friday (except Federal holidays).

D. Wesolowski
Westinghouse Electric Company
