Rich,

The only other potential RAIs I've received so far are the following:

1) The BMPs information we received from the transmission line maintenance department does not include anything about how Progress Energy deals with stream crossings or if it has any special procedures for the streamside management zone. What (if any) procedures are in place to minimize impacts to stream crossings and wetlands? Does Progress Energy maintain streamside management zones?

2) What species and/or occurrences are currently included in the MOU with the Department of Environment, Health, and Natural Resources, and does Progress Energy/CPL plan to update the MOU or the list of species or occurrences covered by the MOU?
