Subject: Amended SDP Active Issues

I've attached an amended version of the SDP matrix for your comment/consideration. It was brought to my attention that I was missing some Fire Protection URIs. And after checking into it, I added 4 more issues to the matrix. Please forward the status of all issues to me by the end of the week. If there are any other issues that are awaiting SDP that are not on the list, please bring them to my attention as well. Thanks.
