<b>Subject:</b> Ni-63 individual source limit		
<p>In an email dated April 13, 2005 David Mack included some general inventory information regarding material on hand. For Ni-63 the license currently limits DLA to 15 mCi per source and 1,500 mCi total. The results of the inventory indicate DLA has a 72 mCi source on hand. This exceeds the 15 mCi per source limit. In the renewal request these amounts remain the same as in the current license. I spoke to an associate of Mr. Mack, Jim Wood, DLA will send a fax to my attention requesting to increase the per source limit for Ni-63 to 75 mCi as part of the renewal action for this license.</p>
