**Subject:** Draft RAI on your proposed amendment re. offsite power line upgrade

Dave:

We are reviewing your 3/25/05 application for an amendment to convert the 69-kV offsite power line to 230-kV. Our reviewer, Narinder Trehan, has the following 3 questions that we would like to discuss with you in a telecon. We may issue these 3 questions as-is, or in some revised form, in a formal RAI:

1. Is the line capable of supplying power at the required voltage to all the plant systems required for normal shutdown and emergency core cooling equipments? Explain the analysis conducted.
2. What is the expected reliability and availability of this line with respect to the reliability of the existing line?
3. What protocol has been established with the transmission system operator to communicate to the licensee the availability of the line to provide sufficient voltage following a plant trip or when voltages would not be adequate?

**This e-mail aims solely to prepare you and others for the proposed telecon. It does not convey an official NRC staff position, nor does it formally request for additional information.**

Peter S. Tam, Senior Project Manager
