MEMORANDUM TO: Robert A. Nelson, Chief  
Uranium Processing Section  
Fuel Cycle Facilities Branch  
Division of Fuel Cycle Safety  
and Safeguards  
Office of Nuclear Material Safety  
and Safeguards

FROM: William von Till, Senior Project Manager **/RA/**  
Uranium Processing Section  
Fuel Cycle Facilities Branch  
Division of Fuel Cycle Safety  
and Safeguards  
Office of Nuclear Material Safety  
and Safeguards

SUBJECT: SITE VISITS AND MEETINGS WITH THE U.S. DEPARTMENT OF  
ENERGY (DOE) AT THE FOLLOWING SITES: NATURITA, SLICK  
ROCK, HECLA DURITA, AND URAVAN

On May 3, 2005, I met with Mike Tucker, of DOE, and Dick Davalt, of S.M. Stoller (a DOE contractor) at the DOE Grand Junction, Colorado, office. The purpose of these site visits was site familiarization. We traveled south and first stopped at the Title II UraVan uranium processing site and Title I tailings pile for the Naturita site. We then proceeded on to the Naturita Title I old processing site in support of the review of DOE's Groundwater Compliance Action Plan. We drove to the Durita Hecla Title II site in support of license termination issues. Finally, we visited the Title I Slick Rock old processing site in support of the review of DOE's Groundwater Compliance Action Plan for this site.

Two action items were agreed to at these meetings: (1) DOE will obtain information on several residences associated with the Naturita and Slickrock sites; and (2) DOE will measure for free phase petroleum in well 0319 for the UC site at Slickrock.

Docket Nos.: WM-66, WM-86
