Ewan,

Yes, your comments are in the record like all the other comments (i.e., they are in ADAMS). They are not specifically attached to the public meeting transcript (only those submitted at the meeting are attached to the public meeting transcript).

As I described in our earlier phone conversation, there are contractual arrangements we have made with ICF Inc. (our environmental review contractor) to deliver a scoping summary report within three weeks after we forward the public comments. Simply put, we are not in a position to extend this milestone without reshuffling other milestones associated with this environmental review. We (NRC staff) will be working closely with ICF and if time permits we will make every effort to include your comments.

Yes, I did read your comments.
Matt

Matt,

Let me see if I understand it correctly.

My comments have been (or will be) attached to the record. Thanks.

The extent to which they'll be incorporated in the EIS is at the discretion of your contractor.

Is that more or less correct? If so, I have a couple of quick questions.

1. Who's the contractor?
2. Did you get to read the comments yourself?

Thanks again,

-e
