Ewan,

The comments you submitted will be placed in ADAMS as a scoping comment. As I discussed with you on the phone on February 1, the scoping comment period would not be extended, however, if you were able to submit comments quickly (i.e., within the next day or so) they would most likely receive full consideration. On Tuesday February 8, I transmitted the comment letters to our contractor to begin preparation of the EIS scoping summary report. We transmitted your comments to the contractor on February 14. To the extent possible we will incorporate your issues in the scoping summary report.
Matt

This submission is for the attention of

Matthew Blevins
Senior Project Manager
Division of Waste Management and Environmental Protection
U.S. Nuclear Regulatory Commission
(301) 415-7684

It comprises my EIS Scoping Comments for the USEC ACP License Application.

I apologise that it's so late, but I hope it can be attached to the scoping record, as Matt suggested to me in private communication that it could be. Please confirm or deny that it has been attached. I believe its delay is consistent with the amount of extra time I was requesting beforehand. Forgive me, I've been busy.

If it can't be attached to the record, I'd still like to know that the suggestions contained herein have been considered properly in the scoping process.

Please let me know if I need to distribute the document to a service list.

While I have tried to restrict the scope of the document to topics of relevance to the environmental scoping process, I believe some of the material should be of interest to Yawar for the safety review.

Please let me know how I can participate in the safety review.
