SUMMARY

We have reviewed your <sup>app/let</sup> dated 10/21/05 + 10/20/04, requesting <sup>renewal of</sup> your byproduct materials license and find that we need additional information as follows:

1. I advised Richard that there were discrepancies & incomplete sections in renewal correspondence & a response was requested in 60 days, which would be detailed. I also asked if H.E.S.J. used 35,400 sources other than SI-90 eye app & CS-137 inventory requested. He said yes. I noted that no vendor or model nos. & radionuclide data were provided & that was needed. So for now I continued "35,400 - any" work in 60 days, temporarily until this is resolved. Then I expect to delete J. & focus on only what they ask for (SI-192, I-125, etc.).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
