Subject: License Amendment Application NRC License No.: 37-00282-04 Docket No.: 030-05986

Dear Sir or Madam:

SmithKline Beecham Pharmaceuticals d/b/a GlaxoSmithKline wishes to amend it's byproduct material Nuclear Regulatory Commission license to reflect a change in item 9, Attachment 9E (Waste Management) in our license application of 2003. These changes do not change the scope of our license.

We are removing a cold storage trailer (a refrigerated sea-van) that formerly housed radioactive carcasses for decay in storage as referenced in section 9 (page 11 and Appendix 9E) and section 11 (page 25).

Detailed meter and swipe surveys have been performed and documented. These surveys did not determine any fixed or removable contamination exceeding our action levels as stated on page 20 of our 2003 license application and has been released for unrestricted use. As our use of radioactive materials has decreased, we will use chest freezers for animal carcass storage for current and interim carcass waste.

Attached is a copy of the old schematic for building 35 Low Level Waste storage area found in Appendix 9E of our 2003 license application as well as a copy of the new revised schematic. We have removed the cold storage trailer from the revised schematic.

136908 NMSSRGNIMATURIALS-002 If you have any questions or comments regarding this amendment, please contact me directly at (610) 270-4113.

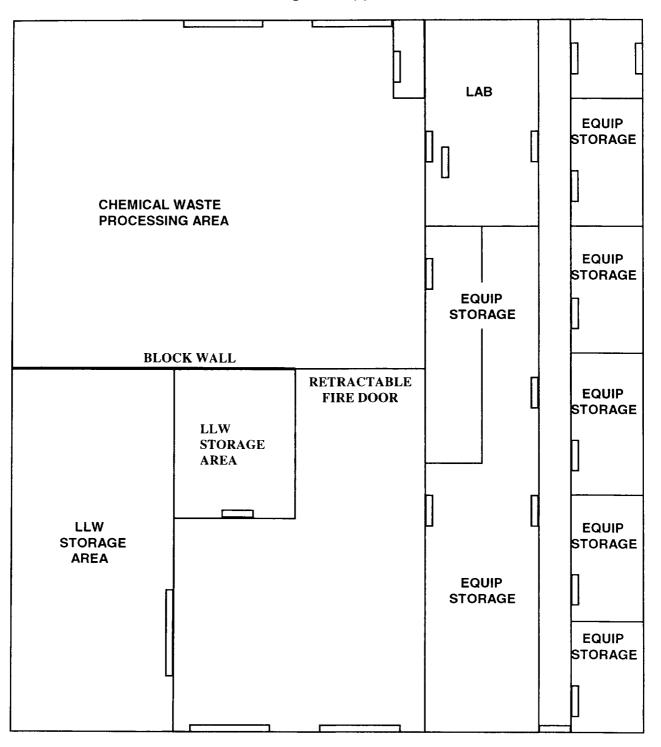

Sincerely,

Jail & Martin

Gail E. Martin Radiation Safety Officer GlaxoSmithKline 709 Swedeland Rd. King of Prussia, PA 19406 Mailcode UE0393
