N. R. C. :

I'm in favor of a second nuclear plant near Clinton. Beings the facility and lake were originally intended for a double-plant, it should certainly be more effecient and cost-effective to utilize the area. And any danger from an accident shouldn't be any worse from a double reactor as from the single one. In time we'll need the increased power output, and it beats the alternative of imported oil.

regards,

John A. Schaefer
