Mike,

I would like to reiterate one of the attached questions that we also discussed after Friday's debrief:

At the end of the inspection, please provide a package of all CRs identified directly and indirectly as a result of this inspection.

Please provide either electronically or hard copy via fax or mail. Would you please reply and indicate when we can expect this information?

Thanks,

Fred

=====

Mike,

I got your voicemail, but it appears that the email problems are solved, so I do not think that I need to call you back at this time.

As we discussed, attached are the new questions developed.

Also, I believe that you accurately captured our earlier phone conversation.

Thanks,

Fred

>>> "Metell, Mike" <hmetell@entergy.com> 08/25/2004 11:53:58 AM >>>

Fred: Thanks for your time to clarify your needs for additional information. Per our

conversation:

1. You requested an email with addresses that would get your new questions to the right folks. I have cc'd the appropriate addresses to get/process this information.

2. You also noted that your new questions did not involve GL 96-05. Because of some of my advance coordination efforts with Jim Taylor (in Fred Burger's absence) I had already implied that such help might be needed. Therefore I have also included Ken Farabaugh, Rich Rusin, and Chris Hansen on

this distribution so they know that you do not have additional questions for them at this time.

3. You also mentioned that normal corrective action processes should be used to capture and process any new issues and not to give you information prematurely. I am using this email to re-enforce this perspective. As we discussed, we have captured new condition reports related to this

inspection in both our NRC assessment database, and PCRS database. (NOTE: Jim Taylor - In Fred's absence please run a PCRS report on CR-s related to this inspection, as this will provide the latest CR count).

4. You mentioned that you had questions in the following 4 areas:
- FW Nozzle (Rico Betti/Paul Rainey)
  - Cable Mega Testing (Marty Flynn/Electrical Team)
  - Switchyard Maintenance (Marty Flynn/Mark Teras/Electrical Team)
  - Vernon Tie (Marty Flynn/Electrical Team)
