Subject: Re: Fwd: ACTION: MD 8.3 Review for Millstone Scram with Complications

Brett,

We will provide whatever technical support is necessary for the SIT in the valve (or pump) areas. Steve Unikewicz will be the designated contact for EMEB on this issue. Please keep us informed of any developments related to this event. Thanks!

Dave,

We held a conference call at 1:30. The region is thinking that an SIT is needed. The risk is in the mid E-6 range. We're expecting a preliminary notification and a charter soon.

Thanks,

Brett

I am available this afternoon.

>>> Brett Rini 04/18/05 11:22AM >>> *MLN*
Dave,

FYI, since you are acting for Gene. Are you available this afternoon?

Thanks,

Brett
