Licensee/Applicant Participant(s):	Organization:	Telephone No.:	
Terry Ogle, Electrical Engineer	Certainteed Corp.	(570) 474 6731 ext. 260	
Person(s) Calling: Sattar Lodhi			
Subject: GL Device			
<p>Summary:</p> <p>The licensee requested to add a GL device containing Sr-90 to its specific license, and requested authorization to perform installation, relocation and alignment of the device. The request included the required information (as suggested in Volume 4 of NUREG 1556), for authorization to perform these services.</p> <p>I called Mr. Ogle to inform him that they do not need to amend their license to acquire the device because according to its SSD certificate, the device is authorized for distribution under general. I explained to him the difference between the two licenses. I asked him to provide the name of their staff member who will perform the installation and relocation, and his training. He stated that the device is going to be installed on a movable C-Frame that will be bolted to the floor on line. They need to move the entire C-Frame from the line in order to perform other maintenance. I requested that he provide details of the operation and gave him control number.</p> <p>He will respond soon via fax.</p>
