

May 26, 2005

Mr. Jerald S. Holm
Director, Regulatory Affairs
Framatome ANP
3315 Old Forest Road
Lynchburg, VA 24501

SUBJECT: ACCEPTANCE OF EMF-93-177(P), REVISION 1, "MECHANICAL DESIGN FOR BWR [BOILING WATER REACTOR] FUEL CHANNELS," FOR REVIEW (TAC NO. MC5665)

Dear Mr. Holm:

By letter dated January 14, 2005, Framatome ANP (FANP) submitted for NRC staff review Topical Report (TR) EMF-93-177(P), Revision 1, "Mechanical Design for BWR Fuel Channels." The NRC staff has performed an acceptance review of the TR. We have found that the material presented is sufficient to begin our comprehensive review. The staff does not expect the need to issue any requests for additional information, and expects to issue its draft safety evaluation by July 22, 2005. The staff estimates that the review will require approximately 200 staff hours including project management time. The review schedule milestones and estimated review costs were discussed and agreed upon in a telephone conference between Gayle Elliot and the NRC staff on May 10, 2005.

Section 170.21 of Title 10 of the Code of Federal Regulations requires that TRs are subject to fees based on the full cost of the review. You did not request a fee waiver; therefore, staff hours will be billed accordingly.

Sincerely,

/RA/

Herbert N. Berkow, Director
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Project No. 728
