LES is required to provide the final executed financial instruments prior to receipt of licensed material. LES is required to update its decommissioning cost estimate and financial assurance instrument at least every 3 years. In its letter of May 16, 2005, LES indicated that, in its first instrument, it would provide for decontamination and decommissioning of the full-capacity facility and for the first 3 years of depleted uranium tails. The total financial assurance for the first instrument would be for \$192,000,000.

LES has a \$1,000,000 policy from American Nuclear Insurers. LES will obtain full coverage required under 10 CFR 140 prior to taking possession of nuclear material.

Morning Johnson,
What is the name of the liability insurance carrier of Les?

Phillip Barr
Lea County

Uranium enrichment facilities are not covered under the Price Anderson Act. However, the "Solar, Wind, Waste, and Geothermal Power Production Incentives Act of 1990" requires uranium enrichment facilities to have liability insurance. 10 CFR 140.13(b) implements the legislative requirements of that Act.

Will Les be covered under the price anderson act?

Phillip Barr
