Letter dated April 26, 2005, Rothman to Nicholson

Dear Mr. Nicholson:

As stated in the April 26th letter, we had several labs at the Philadelphia Plant that used ⁶³Ni electron-capture gas chromatograph detectors. We tracked and did the specified routine wipe testing of all of our detectors and logged that testing. I have reviewed the logbook, with a log sheet for each detector showing the history and wipe tests of all of the Philadelphia Plant detectors, and I can certify that we had no problems or leaks with these detectors. They were properly transferred or disposed before or when the users moved out of the Plant.

Sincerely,

Alan M. Rothman, Ph.D.
