

March 21, 2004

The Honorable Daniel Donatella  
Chairman, Beaver County Commission  
County Court House  
Beaver, PA 15009

SUBJECT: BEAVER VALLEY NUCLEAR POWER STATION - ANNUAL ASSESSMENT OF  
SAFETY PERFORMANCE

Dear Mr. Donatella:

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and the First Energy Nuclear Operating Company (FENOC) in which the NRC staff will discuss with FENOC our annual assessment of the safety performance of Beaver Valley Units 1 & 2.

The meeting will be held at 1:00 p.m. on Wednesday, March 30, 2005, at the Beaver Valley Training Center, room 103, located across Shippingport Road from the Beaver Valley Station's parking area. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with FENOC our assessment of their safety performance of Beaver Valley and their response to our assessment. The meeting is open to the public for observation. Following the presentation, the NRC staff will be available to answer questions from you and members of the public regarding the safety performance of Beaver Valley and the role of the NRC in ensuring safe plant operations. Please feel free to contact me in advance if there are any particular topics of interest that you would like to discuss at the meeting.

The NRC recently completed its annual assessment of the safety performance of Beaver Valley Units 1 & 2 in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from January 1, 2004 through December 31, 2004. We described our assessment results in a letter to FENOC on March 2, 2005. A copy of that letter is enclosed along with the NRC's meeting notice with attached meeting agenda. The draft slides for the meeting can be located in the NRC's online document system (ADAMS) with Accession Number ML050750418. ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at Beaver Valley through the NRC Web site. This information may be accessed at:  
<http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.

Your schedule permitting, I look forward to meeting you on March 30, 2005. In the interim, please do not hesitate to contact me at 610-337-5069, if I can be of further assistance to you.

Sincerely,

/RA/

Arthur Burritt, Acting Chief  
Projects Branch 7  
Division of Reactor Projects

Dear Mayor Pagani:

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and the First Energy Nuclear Operating Company (FENOC) in which the NRC staff will discuss with FENOC our annual assessment of the safety performance of Beaver Valley Units 1 & 2.

The meeting will be held at 1:00 p.m. on Wednesday, March 30, 2005, at the Beaver Valley Training Center, room 103, located across Shippingport Road from the Beaver Valley Station's parking area. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with FENOC our assessment of their safety performance of Beaver Valley and their response to our assessment. The meeting is open to the public for observation. Following the presentation, the NRC staff will be available to answer questions from you and members of the public regarding the safety performance of Beaver Valley and the role of the NRC in ensuring safe plant operations. Please feel free to contact me in advance if there are any particular topics of interest that you would like to discuss at the meeting.

The NRC recently completed its annual assessment of the safety performance of Beaver Valley Units 1 & 2 in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from January 1, 2004 through December 31, 2004. We described our assessment results in a letter to FENOC on March 2, 2005. A copy of that letter is enclosed along with the NRC's meeting notice with attached meeting agenda. The draft slides for the meeting can be located in the NRC's online document system (ADAMS) with Accession Number ML050750418. ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at Beaver Valley through the NRC Web site. This information may be accessed at:  
<http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.

Your schedule permitting, I look forward to meeting you on March 30, 2005. In the interim, please do not hesitate to contact me at 610-337-5069, if I can be of further assistance to you.

Sincerely,

/RA/

Arthur Burritt, Acting Chief

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and the First Energy Nuclear Operating Company (FENOC) in which the NRC staff will discuss with FENOC our annual assessment of the safety performance of Beaver Valley Units 1 & 2.

The meeting will be held at 1:00 p.m. on Wednesday, March 30, 2005, at the Beaver Valley Training Center, room 103, located across Shippingport Road from the Beaver Valley Station's parking area. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with FENOC our assessment of their safety performance of Beaver Valley and their response to our assessment. The meeting is open to the public for observation. Following the presentation, the NRC staff will be available to answer questions from you and members of the public regarding the safety performance of Beaver Valley and the role of the NRC in ensuring safe plant operations. Please feel free to contact me in advance if there are any particular topics of interest that you would like to discuss at the meeting.

The NRC recently completed its annual assessment of the safety performance of Beaver Valley Units 1 & 2 in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from January 1, 2004 through December 31, 2004. We described our assessment results in a letter to FENOC on March 2, 2005. A copy of that letter is enclosed along with the NRC's meeting notice with attached meeting agenda. The draft slides for the meeting can be located in the NRC's online document system (ADAMS) with Accession Number ML050750418. ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at Beaver Valley through the NRC Web site. This information may be accessed at: <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.

Your schedule permitting, I look forward to meeting you on March 30, 2005. In the interim, please do not hesitate to contact me at 610-337-5069, if I can be of further assistance to you.

Sincerely,

/RA/

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and the First Energy Nuclear Operating Company (FENOC) in which the NRC staff will discuss with FENOC our annual assessment of the safety performance of Beaver Valley Units 1 & 2.

The meeting will be held at 1:00 p.m. on Wednesday, March 30, 2005, at the Beaver Valley Training Center, room 103, located across Shippingport Road from the Beaver Valley Station's parking area. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with FENOC our assessment of their safety performance of Beaver Valley and their response to our assessment. The meeting is open to the public for observation. Following the presentation, the NRC staff will be available to answer questions from you and members of the public regarding the safety performance of Beaver Valley and the role of the NRC in ensuring safe plant operations. Please feel free to contact me in advance if there are any particular topics of interest that you would like to discuss at the meeting.

The NRC recently completed its annual assessment of the safety performance of Beaver Valley Units 1 & 2 in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from January 1, 2004 through December 31, 2004. We described our assessment results in a letter to FENOC on March 2, 2005. A copy of that letter is enclosed along with the NRC's meeting notice with attached meeting agenda. The draft slides for the meeting can be located in the NRC's online document system (ADAMS) with Accession Number ML050750418. ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at Beaver Valley through the NRC Web site. This information may be accessed at:  
<http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.

Your schedule permitting, I look forward to meeting you on March 30, 2005. In the interim, please do not hesitate to contact me at 610-337-5069, if I can be of further assistance to you.

Sincerely,

**/RA/**

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and the First Energy Nuclear Operating Company (FENOC) in which the NRC staff will discuss with FENOC our annual assessment of the safety performance of Beaver Valley Units 1 & 2.

The meeting will be held at 1:00 p.m. on Wednesday, March 30, 2005, at the Beaver Valley Training Center, room 103, located across Shippingport Road from the Beaver Valley Station's parking area. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with FENOC our assessment of their safety performance of Beaver Valley and their response to our assessment. The meeting is open to the public for observation. Following the presentation, the NRC staff will be available to answer questions from you and members of the public regarding the safety performance of Beaver Valley and the role of the NRC in ensuring safe plant operations. Please feel free to contact me in advance if there are any particular topics of interest that you would like to discuss at the meeting.

The NRC recently completed its annual assessment of the safety performance of Beaver Valley Units 1 & 2 in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from January 1, 2004 through December 31, 2004. We described our assessment results in a letter to FENOC on March 2, 2005. A copy of that letter is enclosed along with the NRC's meeting notice with attached meeting agenda. The draft slides for the meeting can be located in the NRC's online document system (ADAMS) with Accession Number ML050750418. ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at Beaver Valley through the NRC Web site. This information may be accessed at:  
<http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.

Your schedule permitting, I look forward to meeting you on March 30, 2005. In the interim, please do not hesitate to contact me at 610-337-5069, if I can be of further assistance to you.

Sincerely,

/RA/

Dear Mayor Brozich:

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and the First Energy Nuclear Operating Company (FENOC) in which the NRC staff will discuss with FENOC our annual assessment of the safety performance of Beaver Valley Units 1 & 2.

The meeting will be held at 1:00 p.m. on Wednesday, March 30, 2005, at the Beaver Valley Training Center, room 103, located across Shippingport Road from the Beaver Valley Station's parking area. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with FENOC our assessment of their safety performance of Beaver Valley and their response to our assessment. The meeting is open to the public for observation. Following the presentation, the NRC staff will be available to answer questions from you and members of the public regarding the safety performance of Beaver Valley and the role of the NRC in ensuring safe plant operations. Please feel free to contact me in advance if there are any particular topics of interest that you would like to discuss at the meeting.

The NRC recently completed its annual assessment of the safety performance of Beaver Valley Units 1 & 2 in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from January 1, 2004 through December 31, 2004. We described our assessment results in a letter to FENOC on March 2, 2005. A copy of that letter is enclosed along with the NRC's meeting notice with attached meeting agenda. The draft slides for the meeting can be located in the NRC's online document system (ADAMS) with Accession Number ML050750418. ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at Beaver Valley through the NRC Web site. This information may be accessed at:  
<http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.

Your schedule permitting, I look forward to meeting you on March 30, 2005. In the interim, please do not hesitate to contact me at 610-337-5069, if I can be of further assistance to you.

Sincerely,

/RA/

Arthur Burritt, Acting Chief  
Projects Branch 7  
Division of Reactor Projects
