

June 3, 2005

MEMORANDUM TO: Michael E. Mayfield, Director
Division of Engineering
Office of Nuclear Reactor Regulation

FROM: William H. Bateman, Chief */RA/*
Materials and Chemical Engineering Branch
Division of Engineering
Office of Nuclear Reactor Regulation

SUBJECT: PROPOSED PAPER FOR NUCLEAR PRESSURE EQUIPMENT
EXPERTISE AND REGULATION (NuPEER) 2005 SYMPOSIUM

Staff of the Materials and Chemical Engineering Branch (EMCB) of the Division of Engineering (DE) has authored a paper titled, "Regulatory Perspective on Steam Generator Tube Operating Experience," which was accepted for presentation at the NuPEER Symposium to be held in Dijon, France. A copy of the paper is attached. Edmund Sullivan is planning to attend the meeting on June 22 – 24, 2005, and to present this paper and another paper on Alloy 82/182/600 Susceptibility and Cracking. This memorandum is to request your concurrence on the attached subject paper.

The paper has been prepared in accordance with COM-207, Revision 1, "Procedures for Reviewing and Approving Speeches, Papers, and Journal Articles by NRR Staff," and NRC Management Directive (MD) 3.9, "NRC Staff and Contractor Speeches, Papers, and Journal Articles on Regulatory and Technical Subjects." The paper does not contain significant implications with respect to new or unresolved policy issues.

As required by MD 3.9 and COM-207, NRC Form 390 is attached.
