

Comments on "Supplement to Site Evaluation Report, Peach Bottom  
Atomic Power Station" dated March 4, 1960

Prepared by

Special Projects Section  
Office of Meteorological Research  
U. S. Weather Bureau

March 21, 1960

We have reviewed the Consequences of Release, Section III  
of this supplement and found the air concentrations and sub-  
sequent deposition calculations to be reasonable.

Our previous comments on this site, as stated in our  
letter of February 4, 1960, are still applicable.
