

NOV 10 1960

Dr. Perry F. Prather, Director
State of Maryland Department of Health
301 West Preston Street
Baltimore 1, Maryland

Dear Dr. Prather:

This refers to your letter of October 10, 1960 to Mr. L. R. Gaty, Vice President of the Philadelphia Electric Company regarding the Company's licence application to the AEC for the proposed Peach Bottom reactor. A copy of your letter was furnished us by Philadelphia Electric Company.

After the initial review of the application by our hazards evaluation staff, additional information was requested and was supplied under date of September 27, 1960 as an amendment to the application. This amendment, which also has been sent to Governor Toxes, is under study by the AEC staff. The case will be discussed with and considered by the Advisory Committee on Reactor Safeguards at its December meeting prior to the holding of a public hearing regarding issuance of a construction permit.

In the event that we can be of assistance to you, please feel free to call on us. Should any of your technical advisors wish to visit us, we would be pleased to have our hazards evaluation staff available to discuss any questions they may have.
