Environmental & Sanitary Engineering Branch  
Division of Reactor Development  
Atomic Energy Commission  
Washington 25, D. C.

In re: RD:NT:ESE:JAL

Dear Doctor Lieberman:

The enclosed preliminary agendum will provide further information on our plans to discuss the proposed nuclear power plant of the Philadelphia Electric Company.

I very much regret that we have been unable to find a better date than June 6 which will conflict with your own schedule. We have also invited to the meeting Dr. Harold L. Price of the Division of Licensing and Regulation. If Dr. Price can attend the meeting perhaps he can review Federal policies and regulations, or if he has other commitments, Dr. Abel Wolman can represent in some degree the Federal interest.

Again I regret that it was impracticable to find a date which fitted your schedule and which was also agreeable to our own officials and agencies. If your commitments change so that you are free on June 6 we hope you will plan to join us.

Sincerely yours,

Wm. H. Bayle

William H. Bayliff  
Executive Secretary
