PUBLIC HEARING ON PEACH BOTTOM REACTOR

Dear Doctor Biles:

Thank you for your letter of December 6th, Ref: Docket No. 50-171,184, and for the Hazards Analysis for the Philadelphia Electric Company Peach Bottom Atomic Power Station. I enjoyed attending the Public Hearing which commenced at Germantown on December 18th.

As you know, the Australian Atomic Energy Commission is carrying out a research programme which it hopes will lead to the development of high temperature gas cooled reactors in Australia and, consequently, the A.A.E.C. will be most happy to receive the information which I have passed on to them from the Hearing.

Yours sincerely,

A handwritten signature in cursive script, appearing to read 'Ian J.W. Bisset'.
