Dr. Martin B. Biles  
USAEC Scientific Advisor to the  
European Communities  
23 Avenue Des Arts  
Brussels, Belgium

Dear Martin:

I am planning on being in England some time during the month of August to visit Douvres, AGCR, and Dragon reactors. I am writing Nordlinger to arrange such a visit some time during the last three weeks of August. I am enclosing a copy of the letter to him.

I hope that you can make arrangements to meet with me for at least one or more days during this visit, in either England or Brussels, to discuss the Peach Bottom reactor. Philadelphia Electric has filed amendments submitting its Final Hazards Summary Report and Proposed Technical Specifications for the Provisional Operating License. We are now planning to take the matter to the ACRS in November, looking towards initial startup about February 1.

I am sending you a copy of the Final Hazards Summary Report and the Proposed Technical Specifications. I hope that you will be able to find some time to look over these documents and let me have the benefit of any comments or suggestions you care to make.

Please let me know if your schedule will allow us to get together and whether you prefer London or Brussels. I will let you know of my exact plans as soon as I hear from Nordlinger.

Sincerely yours,

Saul
