REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

APR 22 2005

Edward F. Downey, Jr., D.O.
Radiation Safety Officer
Phelps County Reginal Medical Center
1000 West Tenth Street
Rolla, MO 65401

Dear Dr. Downey:

Enclosed is Amendment No. 28 renewing your NRC Material License No. in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please be advised that your request to add the Mallinckrodt Medical B.V. sealed source to your NRC license as an authorized source for use in the GammaMed 12it was not approved at this time. This source does not appear to be an authorized source for use in the GammaMed 12it according to the Sealed Source and Device Registry. You may amend your license in the future after this source has been approved for use in the GammaMed 12 it.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability."

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

James R. Mullauer, M.H.S.
Health Physicist
Materials Licensing Branch
