Subject: VY EPU - Draft RAIs attached (May contain proprietary info)

Ronda,

Attached is a draft set of RAIs that includes questions from EEIB (Station Blackout), EMEB (steam dryer issues), SPSB (NPSH), and SRXB (various issues). Additional RAIs are being developed by SRXB concerning the methods used by GE for the thermal/hydraulic analyses. Hope to get those to you later this week.

Note, I've tried to edit the input I received from NRR Tech Staff to remove proprietary info where possible, however, I believe some of the EMEB questions and possibly some of the SRXB questions may still contain proprietary info. Please forward the RAIs to your contractors to determine if we need to redact any of the information shown before we issue these via formal letter that is publicly available.

The NRR staff is ready to have conference calls as needed to ensure you understand the questions.

thanks,

Rick
