Licensee/Applicant Participant(s):	Organization:	Telephone No.:	
Brent Moore, Vice President	Mega Contractors, Inc.	804 749 3266	
Person(s) Calling: Sattar Lodhi			
Subject:			
<p>Summary:</p> <p>The licensee's application only requested cesium 137 for use in Troxler Models 3400 series, 4640, 4545, or 3565. Few of these models also use americium 241. The current license authorizes cesium 137 and americium 241. Additionally, the current address of storage does not match the one in the renewal application.</p> <p>I called the licensee to obtain clarifications of these items. Mr. Moore stated that they have never possessed any model other than 4640 and 4640 B, and do not intend to acquire any other model. He stated that americium 241 need not be included in authorized material. I requested that he provide us with a statement that they never possessed americium or any gauge other than 4640 and 4640B (they only include cesium 137 source). He will send a letter confirming this.</p> <p>He also stated that the storage location has not changed. Now a street address is assigned to the storage location.</p>
