Ronda,

Attached is a revised set of RAIs. These supercede the set I emailed on 6/8/05. The changes since then are as follows:

- 1) Added new RAI SPSB-C-52 from Harold Walker.
- 2) Revised RAI SRXB-A-12 from Muhammad Razzaque.
- 3) Added new RAIs SRXB-A-24 through SRXB-A-88 from Zena Abdullahi on GE methods issues.

This completes all RAIs that I am aware of at this point. Let me know when we can set up conference calls to discuss the questions. After you understand the questions and the scope of the request, I will be looking for an expected response time so I can issue these RAIs formally. Your response time is also needed for the staff to reestablish the review schedule.

Note, these RAIs contain proprietary information. Please discuss with your contractors which portions they believe need to be redacted or otherwise reworded to remove the proprietary information.

thanks,

Rick
