

June 14, 2005

MEMORANDUM TO: William H. Ruland, Deputy Director
Licensing and Inspection Directorate
Spent Fuel Project Office, NMSS

FROM: Jill Caverly, Project Manager /RA/
Licensing Section
Licensing and Inspection Directorate
Spent Fuel Project Office, NMSS

SUBJECT: SUMMARY OF JUNE 2, 2005, MEETING WITH BNG FUEL SOLUTIONS
TO DISCUSS THE UPCOMING LICENSING ACTION ASSOCIATED
WITH REVISION OF TECHNICAL SPECIFICATIONS FOR
MONITORING LOW HEAT LOAD CASKS

Background

BNG Fuel Solutions (BNG) requested a pre-licensing meeting with the U.S. Nuclear Regulatory Commission (NRC) staff. BNG is finalizing an application for a revision to technical specifications for casks with low heat loads. The proposed changes will effect casks located at Big Rock Point Independent Spent Fuel Storage Facility. The meeting was noticed on May 19, 2005, (ML051390200). An attendance list for the June 2, 2005, meeting is provided (Attachment 1).

Discussion

Mr. Steven Sisley, BNG, delivered a presentation to the NRC staff that discussed a future licensing action which BNG plans to submit to NRC in late June 2005. The action will request revisions to current technical specifications including revising periodic monitoring, adding a storage cask periodic monitoring plan, and revising actions and completion times. In addition to the licensing action summary, BNG provided an overview of the thermal analysis that will accompany the request. The slides presented by Mr. Sisley are provided (Attachment 2).

No regulatory decisions were requested and none were made during the meeting.

Docket No. 72-1026
TAC No. L23847
