

"INFORMATION NEEDED FOR CHANGE OF CONTROL"**Definitions:**

Control: Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license.

Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of a U.S. Nuclear Regulatory Commission-licensed operation.

Transferor: A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Information Needed for Transfer of Control

Licensees must provide full information and obtain prior written consent before transferring control of the license. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.

1. Provide a complete description of the transaction (transfer of stocks or assets, or merger). Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact whom the NRC may contact if more information is needed.

GEOTEC will no longer own or operate the Nuclear Gauges. The radioactive material license will be transferred to Geo Services. Geo Services will be the new owner of the Nuclear Gauges. Geo Services will take over the existing facility that contain and house the Nuclear Gauges.

NRC 52-17662-02

03030421

New Owner**Name and street addresses:****a) Mailing address**

Geo Services
130 Winston Churchill
Suite PMB 317
San Juan, PR 00926-6018

b) Main Office address and physical location (storage/location of the radiation sources & records)

Geo Services
1757 Ext. Ave. Ponce de León
Carr 8838, Bo. Monacillos
Rio Piedras, PR 00926
(787) 751-5911 & 751-5915
Fax (787) 250-0197

2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel.

No change to the program. The authorized users and RSO will remain the same.

3. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.

No change to the program. The facility's location, procedures and equipment will remain the same.

4. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.

The program is currently active. However, all of the surveillance programs are following NRC regulations and will be maintained through out the transfer is complete.

5. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels, and fixed and/or removable contamination, including methods and sensitivity.

All records concerning the facility will be transferred to the transferee. These records will include the documentation of surveys of ambient radiation levels, and fixed and/or removable contamination, including methods and procedures.

6. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor, or that the transferee will submit a complete description of the proposed licensed program.

Geo Services will abide by all constraints, conditions, requirements and commitments of the current license.

President

Attachments: Agreement between GEOTEC and Geo Services.

June 2, 2005

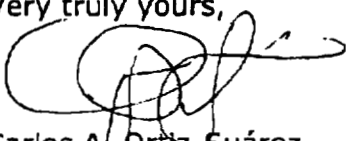

To Whom It May Concern:

Recently *Geotec*, sold its construction material's laboratory to *Geo Services and Engineering*, a corporation recently organized and owned by two of *Geotec's* former employees.

Geo Services occupies the physical space that *Geotec* dedicated to its materials laboratory on the first floor of the *Geotec* building.

As part of this sale we sold them six moisture-density nuclear gauges. While they await a new license, or the transfer of *Geotec's* license to *Geo Services*, the gauges are to be stored by *Geotec* in its licensed facilities and used by licensed technicians previously working for *Geotec*.

Very truly yours,

Carlos A. Ortiz-Suárez
President
