7 June 2005

Mr. Gary Janosko, Chief
Fuel Cycle Facilities Branch
Division of Fuel Cycle Safety and Safeguards
Office of Nuclear Material Safety and Safeguards
Mail Stop T-8A33
11545 Rockville Pike
Rockville, Maryland 20852-2738

Dear Mr. Janosko:

Subject: Sweetwater Uranium Project – Docket Number 40-8584 – Source Material License #SUA-1350 – Request to Complete Previously Requested Deletion of Obsolete Language from Source Material License #SUA-1350

Kennecott Uranium Company requests that the license changes (deletion of obsolete language) requested on page 3 of the *Request for a Ten (10) Year License Renewal* dated May 25, 2005 be made.

The *Request for a Ten (10) Year License Renewal* dated May 25, 2005 contained within it, on page 3, a request to delete certain obsolete language from the license. The renewed license dated November 10, 2004 did not include these requested deletions. Stephen Cohen of your staff and I discussed these requested deletions in a telephone conversation on the morning of June 2, 2005. He suggested that a letter requesting that these previously requested deletions be made should be prepared and submitted.

If you have any questions please do not hesitate to contact me.

Sincerely yours

Oscar Paulson
Facility Supervisor
