Subject: Re: HMG TERMINATION

Scott:

Please fax to me a drawing of the hot lab, camera room and toilet identifying the results of the radiation level and the removable contamination surveys. In addition, please fax me transfer records and transfer of decay-in-storage waste of the sealed sources and waste transferred to The Queen's Medical Center. Or you may fax me a copy of the latest leak test results for the sealed sources transferred to The Queen's Medical Center. These records and documentation will greatly help me in expeditiously processing your request.

My fax number is noted below.

Mahalo,
Jacqueline "Jackie" D. Cook
Senior Health Physicist

Aloha Scott:

Please note that the termination request for Honolulu Medical Group has been "in-house" for 16 days. It is the next pending folder in the drawer and has a label requesting it be expedited highlighted on the folder. However, 2 of the Senior level staff are out of the office next week, so hopefully, we can get to it within the next couple of weeks.

I hope this is acceptable.

Mahalo in advance for your understanding and patience in this matter,
